- SEMI-DRY** **Harrison [7.2% ABV]** - Yakima, WA - Harrison was one of America's oldest cider apples and here prior to the founding of the country. It was thought to be lost but a tree was found in 1976 in NJ and brought back from extinction. The cider is bright and refreshing, the perfect warm weather drink. The finish is citrusy, reminiscent of orange peel and coriander.
- MEDIUM** **Ruby Jon [6.6% ABV]** - Masonville Orchards, CO - Ruby Jon is a type of Jonathan apple with skin so dark that it nearly looks black. The ciders is fresh and fruit forward, subtle yet flavorful, reminiscent of strawberries and cream. 2018 Vintage
- MEDIUM** **Manchurian Crab Apple Blend [6.4% ABV]** - Yakima, WA - This tiny apple originates from Northern Asia and is usually overlooked - it is used as an orchard pollinator but rarely for anything else. We believe this tiny fruit is exceptional and we showcase its strong tannin, lasting acidity and beautiful flavors ranging from pear to yellow stone fruit. 2018 Vintage
